3 YARN................................................................................................................................. 2
4 MapReduce.......................................................................................................................... 2
Hadoop tracks both bugs and enhancement requests using JIRA. We welcome input, however, before filing a request, please make sure you do the following:

- Search the Apache JIRA database.
- Check the users mailing lists, both by searching the archives and by asking questions.

1 Common
Hadoop Common issues are tracked in the HADOOP Jira instance.

2 HDFS
HDFS issues are tracked in the HDFS Jira instance.

3 YARN
YARN issues are tracked in the YARN Jira instance.

4 MapReduce
MapReduce issues are tracked in the MAPREDUCE Jira instance.
